

MIDTERM EXAMINATION
1st Semester, AY 2026 – 2027

Course Title: ITE404A - UI/UX
Instructor's Name: Chiara Marie C. Canque
Allotted Time: 2 hours
Highest Possible Score: 100
Score per Test Part: I - 100

Name: _____
Date: _____

Instructions: Choose **ONE** e-commerce website from the list below and deconstruct its interface based on the following steps.

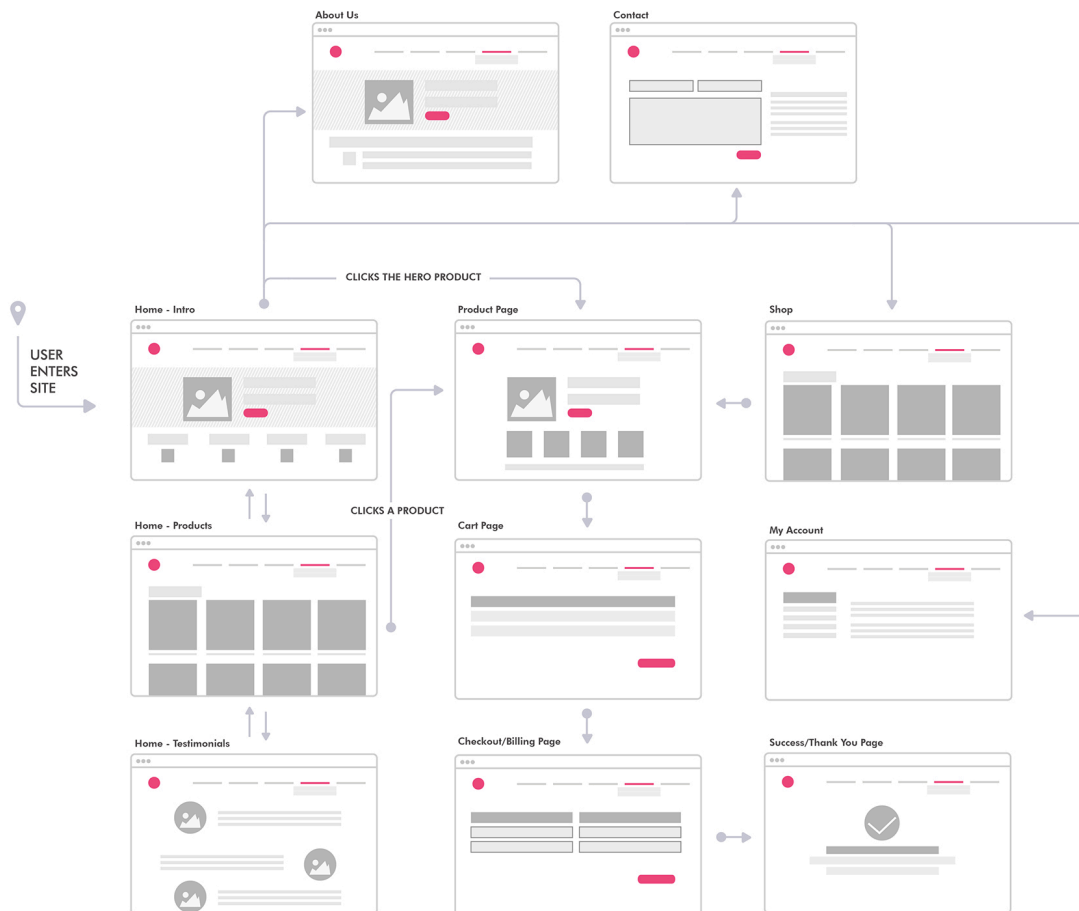

1. Shopee
2. Lazada
3. Amazon
4. eBay
5. Etsy
6. Temu
7. Nike
8. Apple
9. IKEA

1. Map the User Flow

Analyze the user task and trace the user's journey from start to finish.

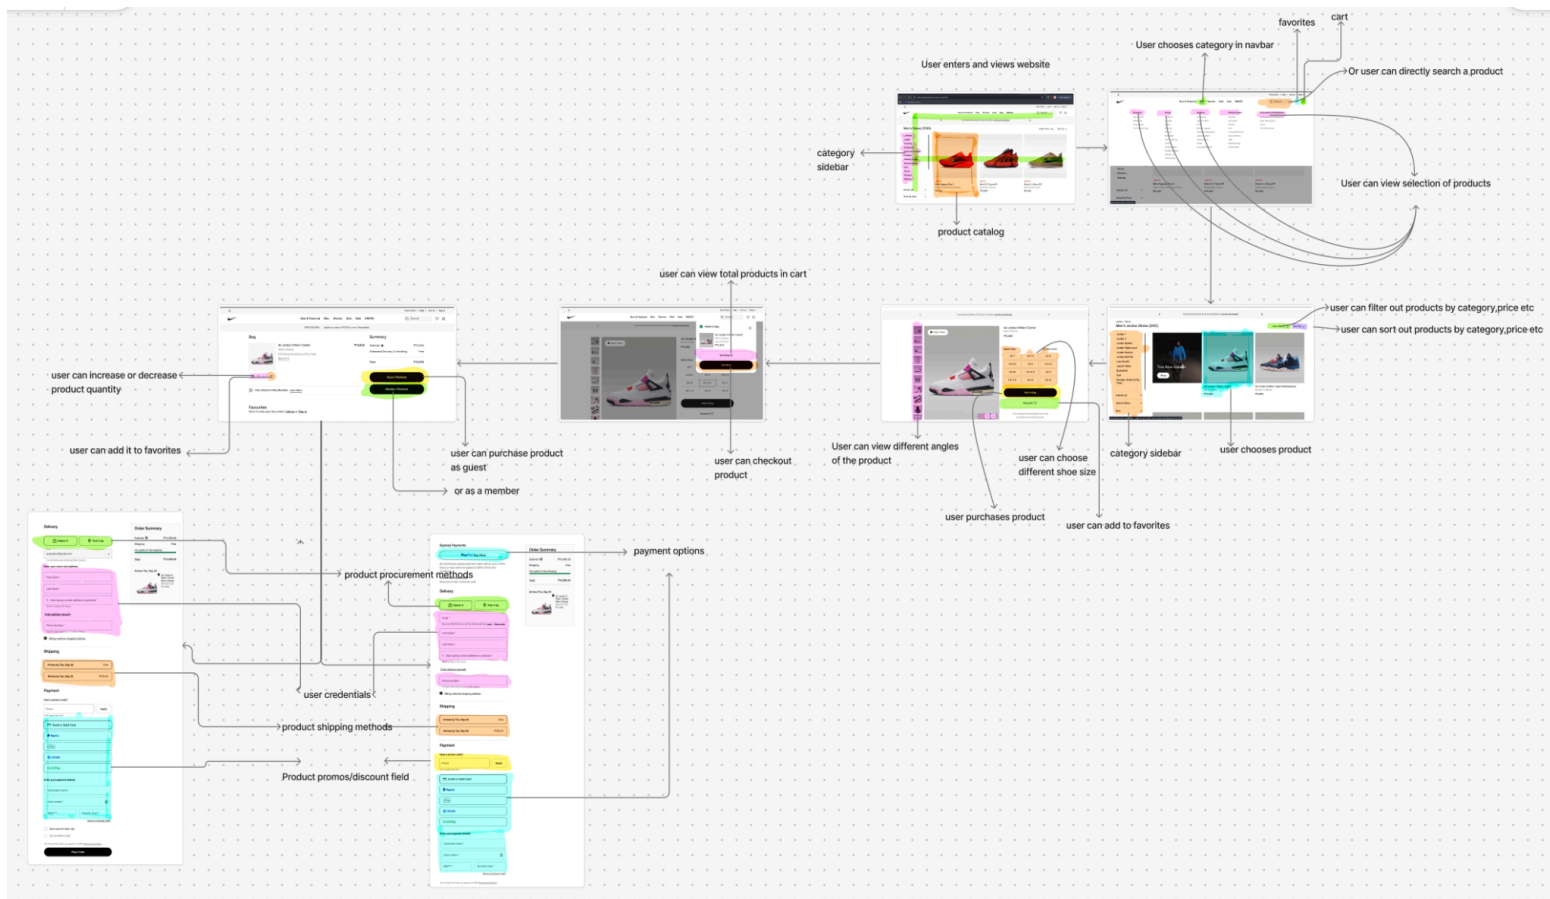

A user visits the website, searches or browses for a product, selects a product, adds it to the cart, and proceeds to checkout.

Example:

The flow must be understandable based on arrows, labels, and actions. No explanations should be needed.

Answer:

2. Deconstruct Each Screen

Choose **one screen** identified in Item 1 above, then deconstruct the interface into its major sections and UI elements.

Required Output for the Screen

1. Paste the **screenshot** of a screen.
2. Identify the name of the screen.
3. Identify and label the major sections.

Example:

Title: Landing Page

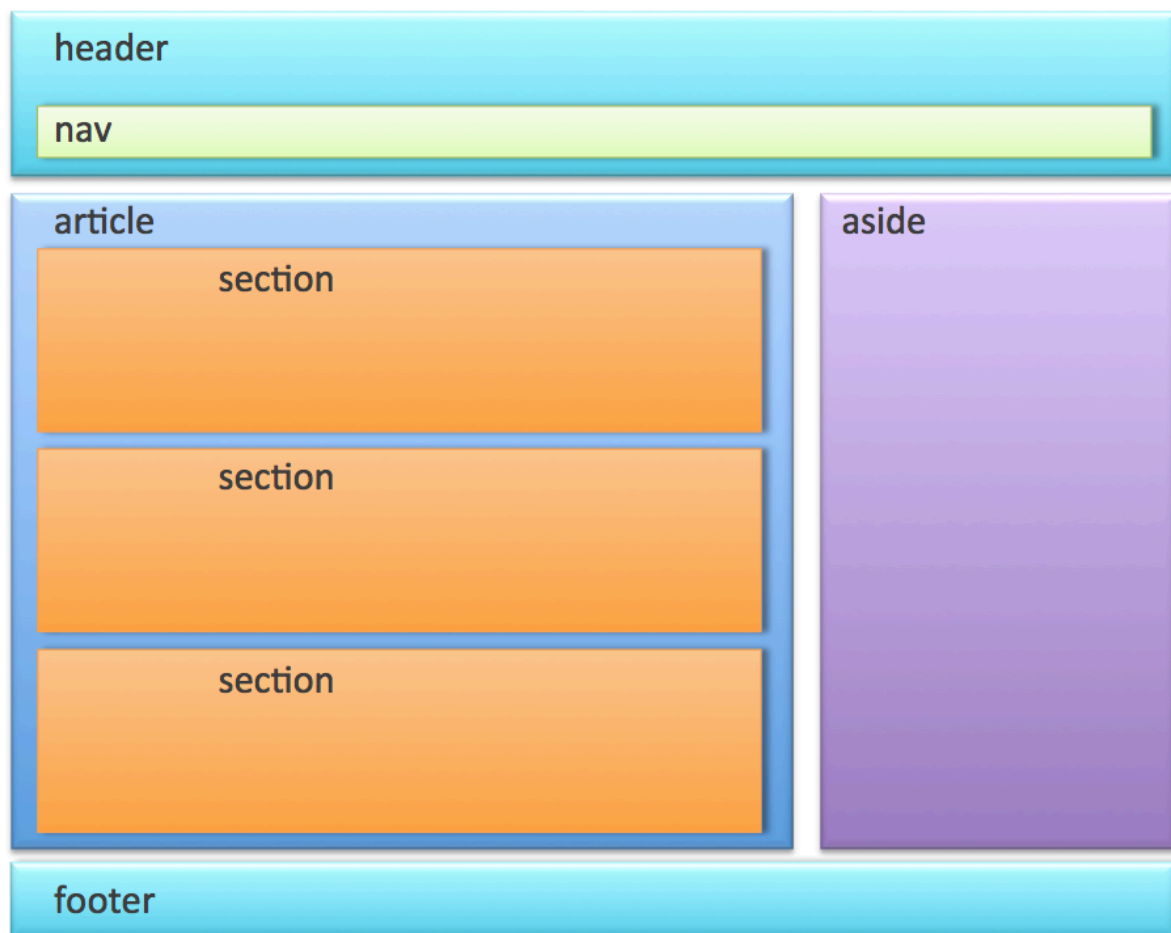

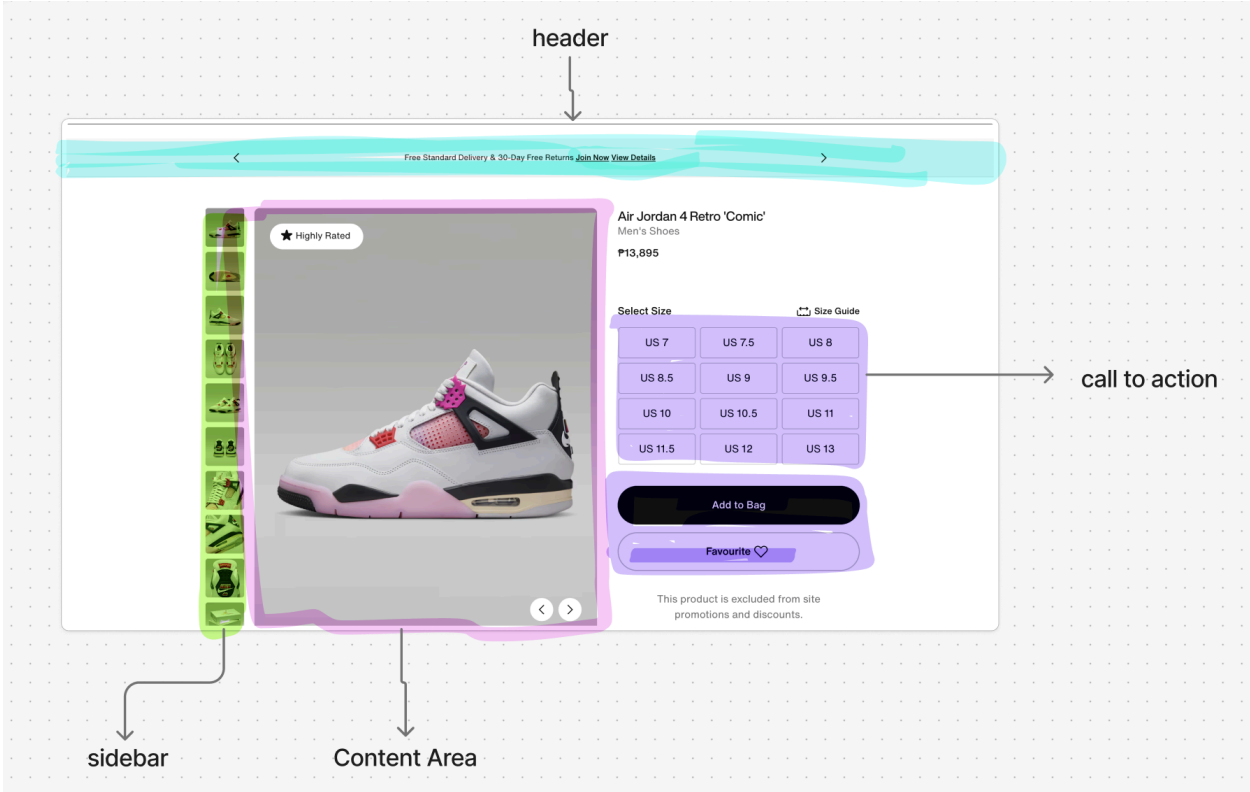

Image is only an example. The identification and labeling of sections should overlap the original screenshot. You may annotate or edit the screenshot.

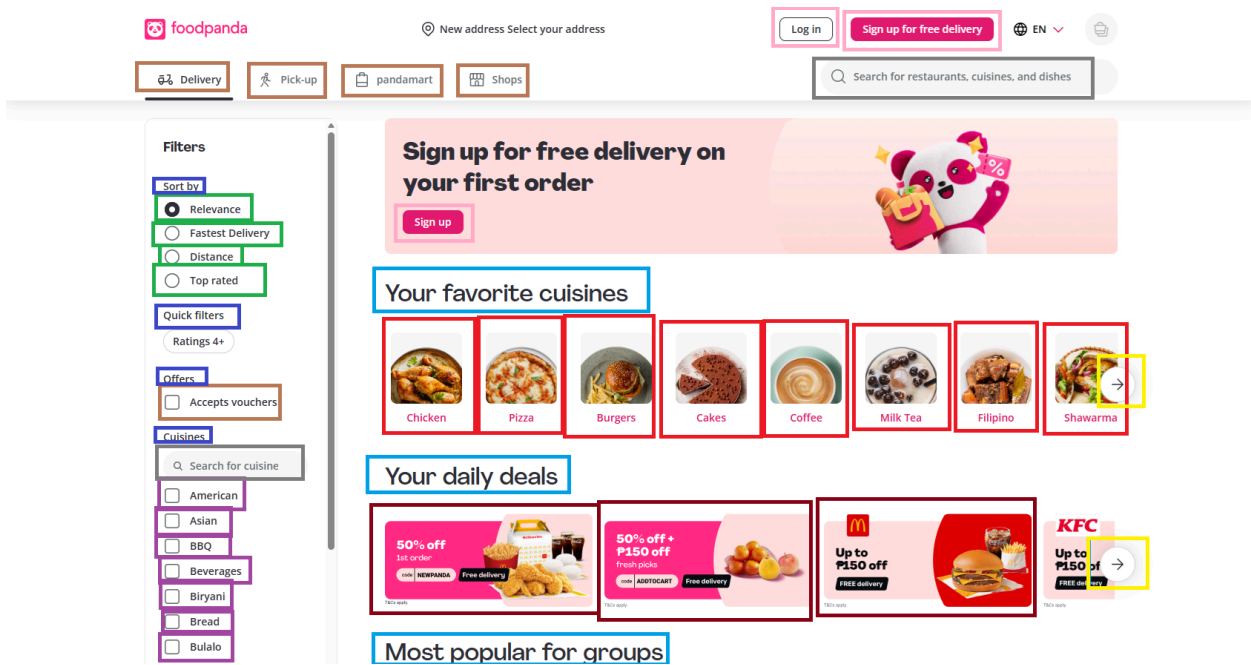

Answer:

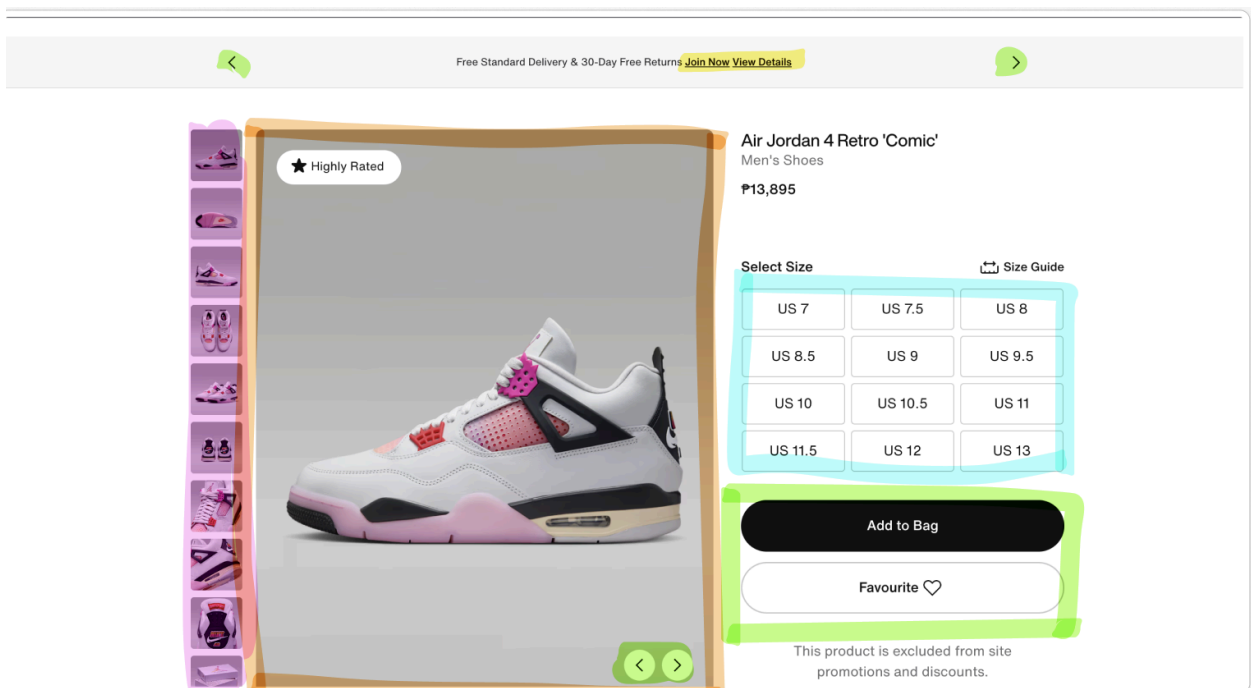

3. Identify Repeated and Related Elements

Group elements that share the same structure, appearance, or purpose. Identify which elements form interface components.

Example:

Answer:

4. Extract the UI Elements Individually

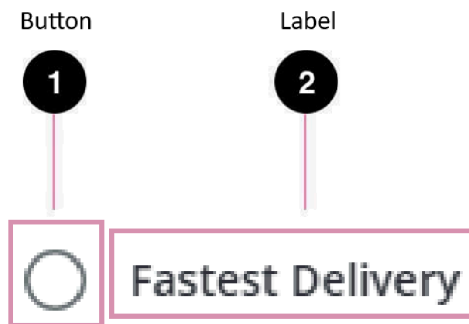

Using the annotated screens from Item 3 above, extract the **individual UI elements** that make up the interface component, then label its anatomy.

Each extracted element must be presented as an individual asset.

Do not submit a full-screen screenshot as your element inventory.

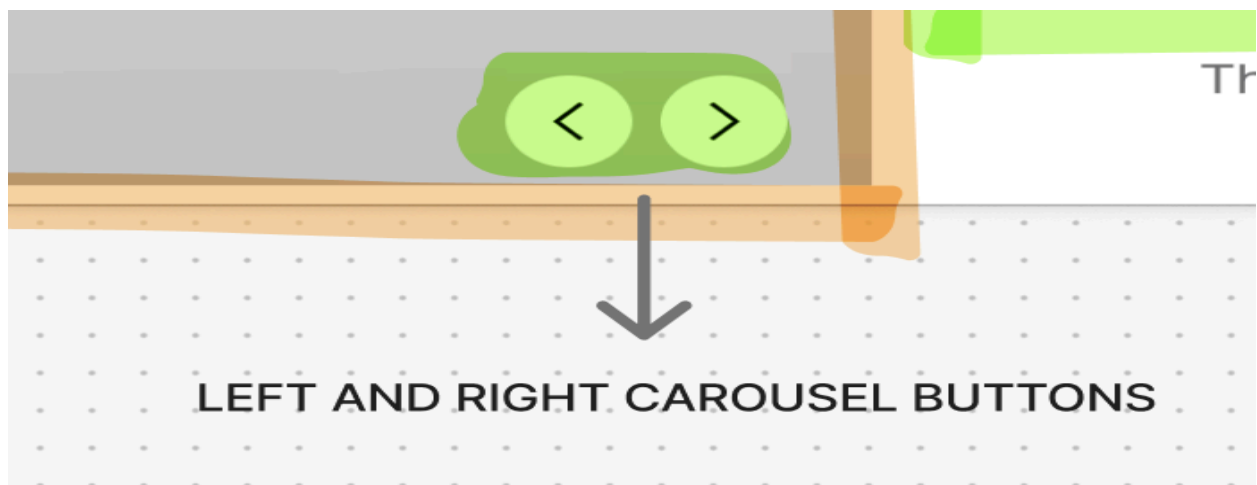

Example:

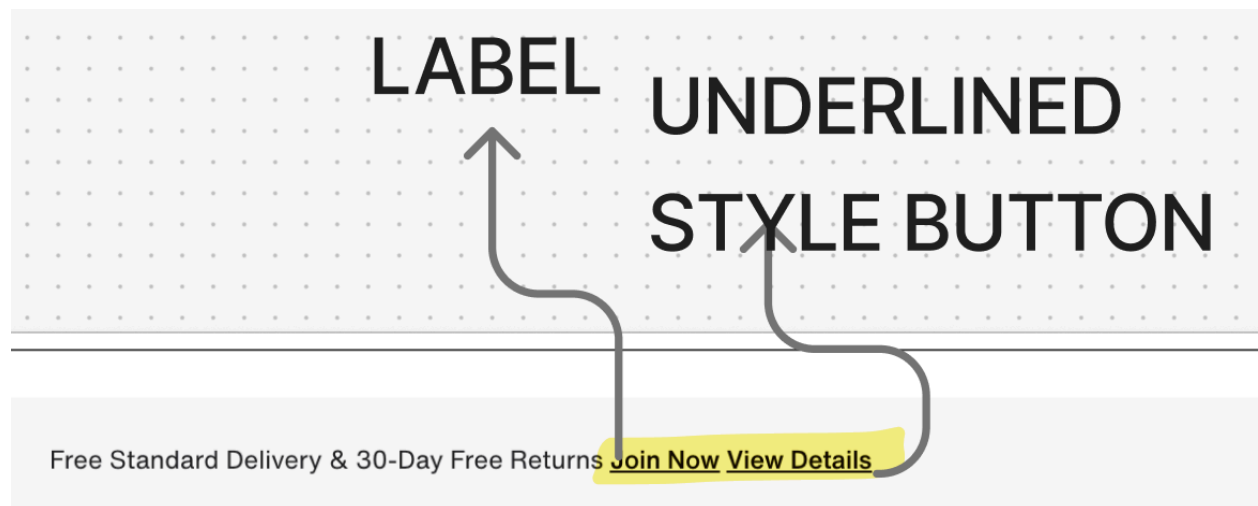

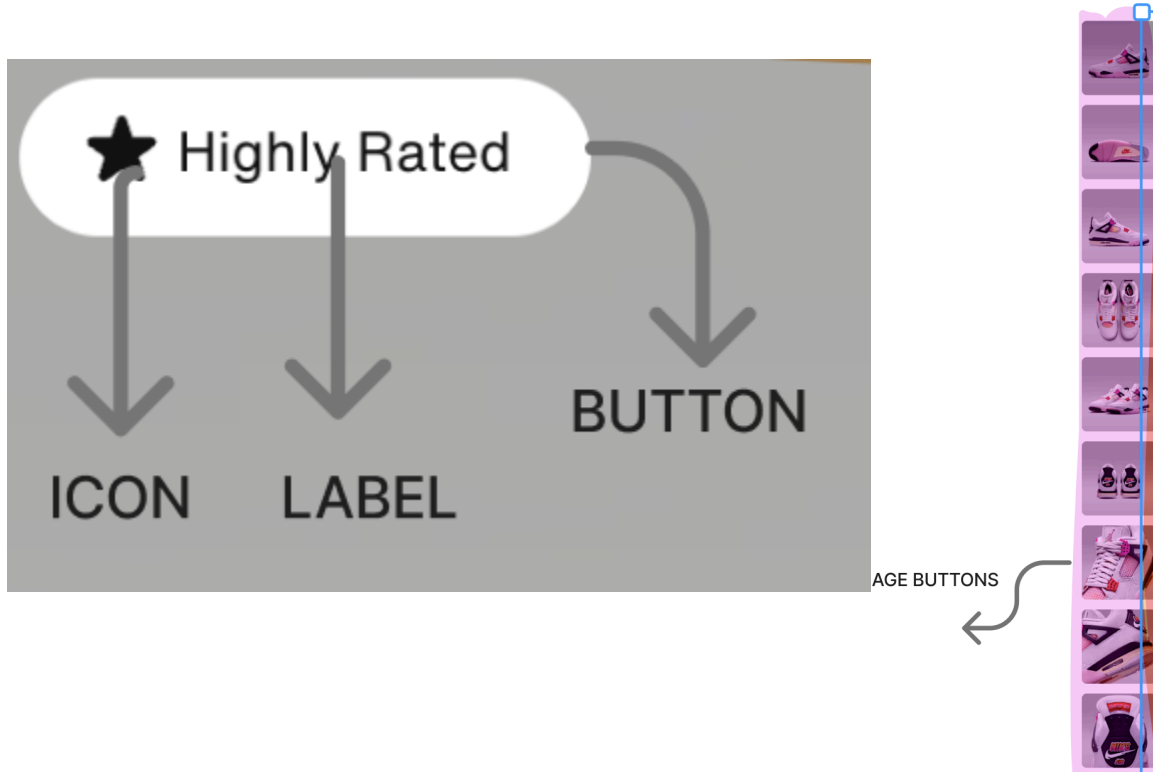

Radio Button

Do the same for the remaining elements

Answer:

5. Create the UI Assets in Figma

Using the extracted assets from Item 4 above, recreate the individual UI elements in Figma, so that each component in Item 3 is recreated into 1 single asset.

Your Figma file must contain a dedicated **Assets** section.

Required Output

[PASTE SCREENSHOT OF THE ENTIRE FIGMA ASSETS / FOUNDATIONS]

Include the recreated:

- Icons
- Buttons
- Inputs
- Images
- Other extracted UI elements

Example:

Buttons

Primary

No Icon

Default

Label

Language Button

Default

🌐 Label ▼

Tags

🍷 Super restaurant

Answer:

❖ Add to Bag button

Add to bag

❖ Favorite button

Favorite 

Favorite button

Label

Favorite

Favorite

Rectangle 2

6. Convert UI Elements into Components

Using the extracted UI assets, create reusable components in Figma.

From your created single asset in Item 5, make it into a Main Component, then create another instance of it to edit another asset of the same component.

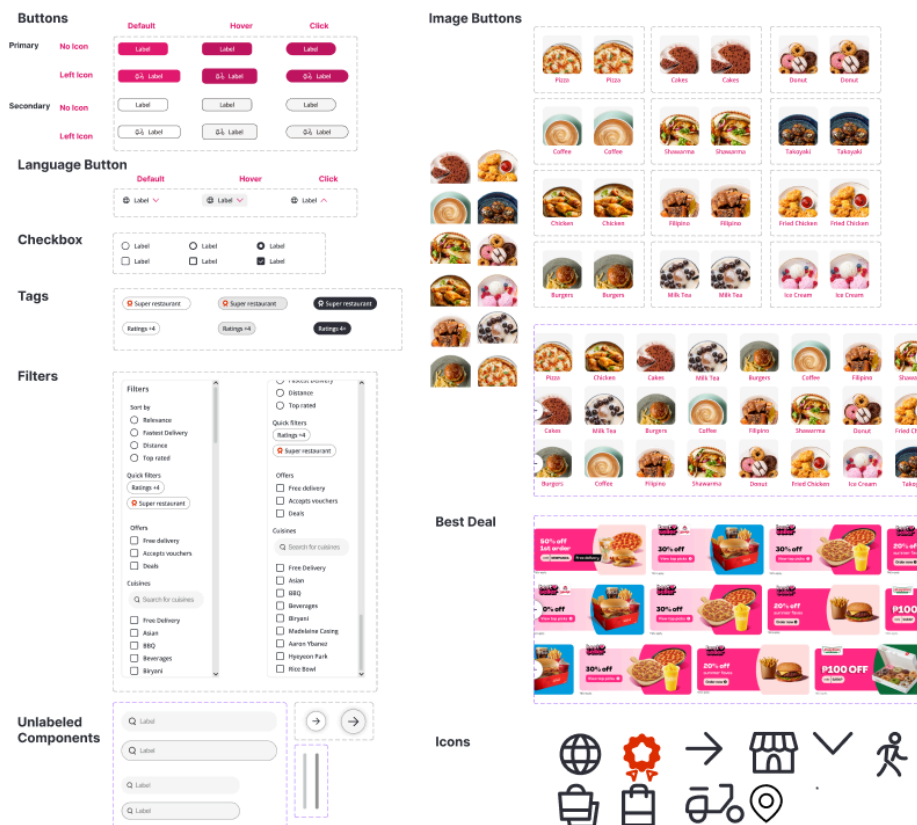

(e.g. Asset: Button. Instances: Login, Sign up)

Your components must be based on the elements identified in Item 3.

Required Output

[PASTE SCREENSHOT OF YOUR FIGMA COMPONENT LIBRARY]

Example:

Answer:

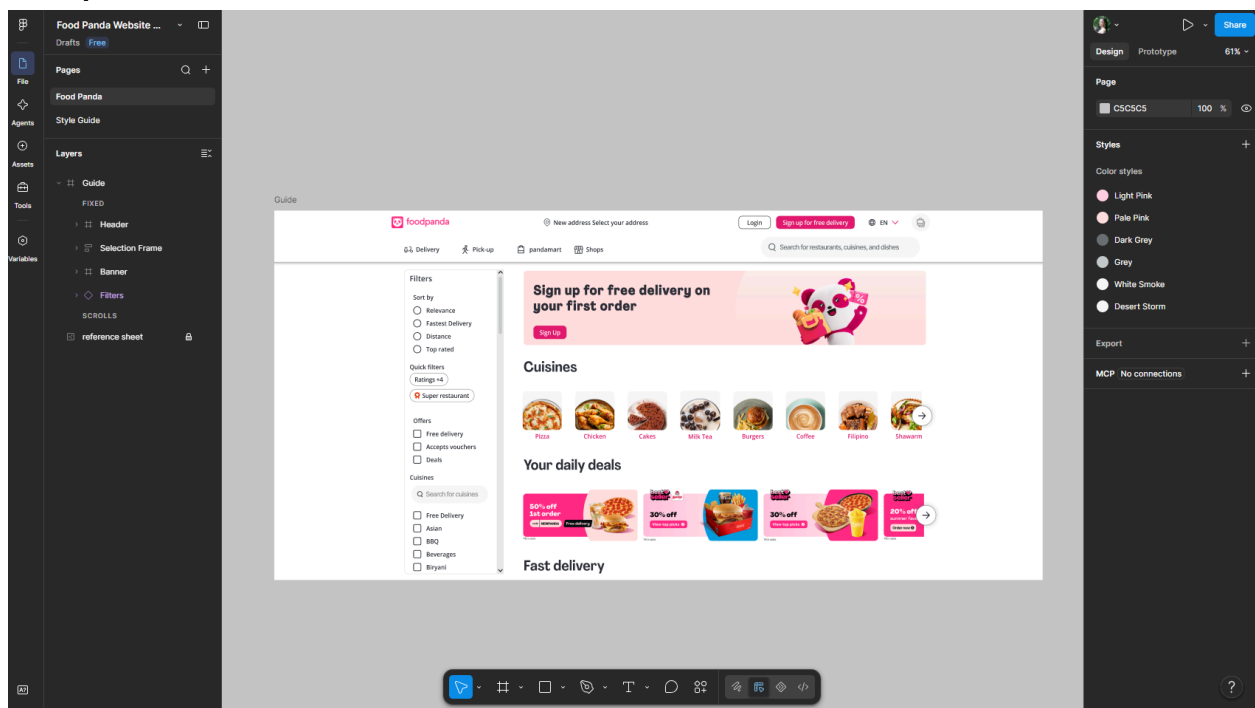

7. Reconstruct a Selected Screen

Reconstruct the entire screen using the components created in Items 5–6.

Requirements

- Use the extracted UI elements as the basis for the reconstruction.
- Use reusable components for repeated interface elements.
- Use composite components where applicable.
- Maintain the visual structure and consistency of the original interface.
- Do not rely on a full-screen screenshot as the reconstructed interface.

Example:

Answer:

Exam Items	Criteria	Points	Score
I. Map the User Flow	Accuracy, completeness, and clarity of the user flow	15	
II. Deconstruct Each Screen	Identification and annotation of screen sections	15	
III. Identify Repeated and Related Elements	Proper grouping and identification of UI components	15	
IV. Extract UI Elements Individually	Completeness, accuracy, and organization of extracted elements	15	
V. Create UI Assets in Figma	Accuracy, completeness, and organization of recreated assets	15	
VI. Convert UI Elements into Components	Proper creation, reuse, and organization of components	15	
VII. Reconstruct a Selected Screen	Visual accuracy, component usage, consistency, and completeness	10	
TOTAL		100
